

BIG BUCK HAVEN

This beautiful property has been respectfully and responsibly managed, making it a safe haven for all wildlife. This is truly a piece of Heaven on Earth. Bucks and Does make this their home year round, and have been selectively harvested to improve big buck genetics. A mature age class of a deer exists and has made for some intense, action packed hunts in this low pressure environment. The owners have enjoyed daytime deer movement throughout the hunting seasons, providing ample opportunities for deer interaction. This property has held some true giants in the whitetail world. 200" potential is a dream for some, but has been a reality with this property!

The trails have been well maintained, providing access throughout the property.

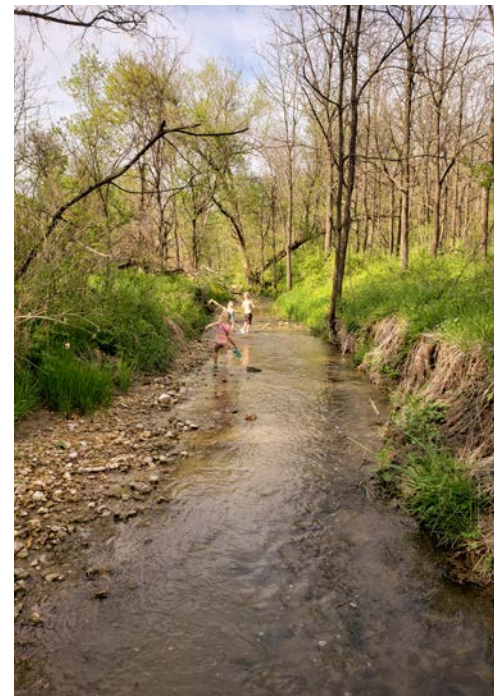

There are multiple springs originating from this property as well as multiple creeks entering from adjacent properties. These cold spring fed creeks flow the length of the land and currently run year round.

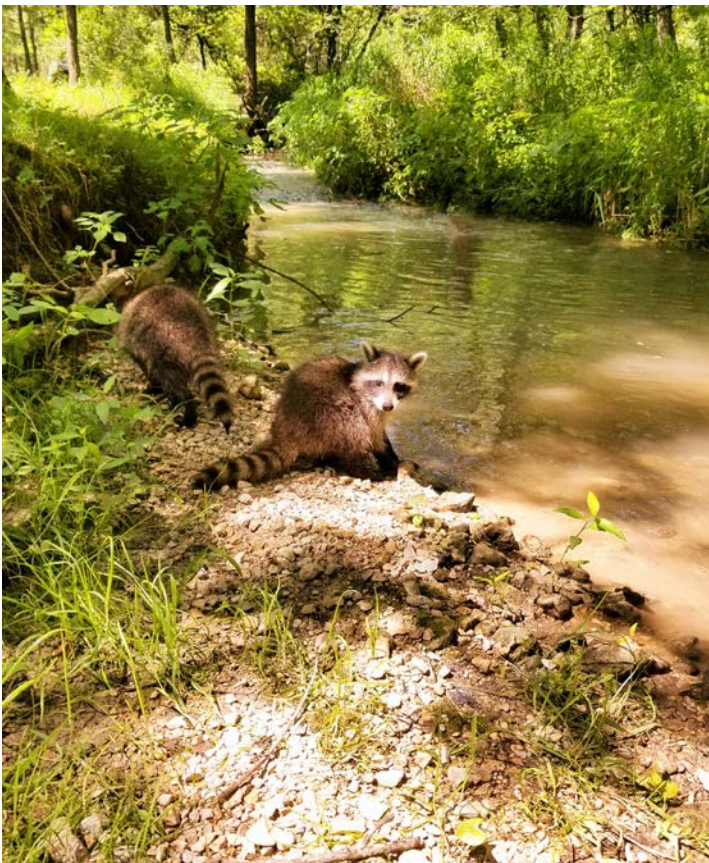

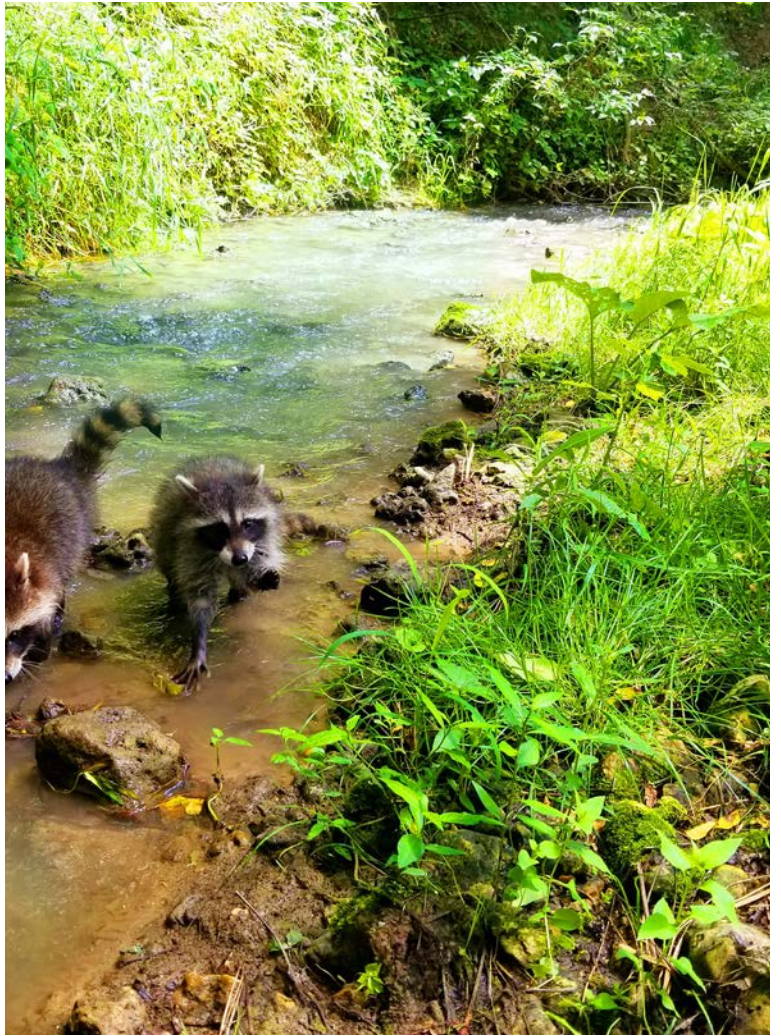

There are multiple sources for foraging, and living a self sustaining lifestyle. This includes nut varieties (walnut, acorn, butternut), mushroom varieties (morel, oyster, chicken of the woods, hen of the woods, pheasants back, puffballs), black raspberries, mulberries, gooseberries, wild plums, wild grapes, apple trees, and maple trees for collecting sap.

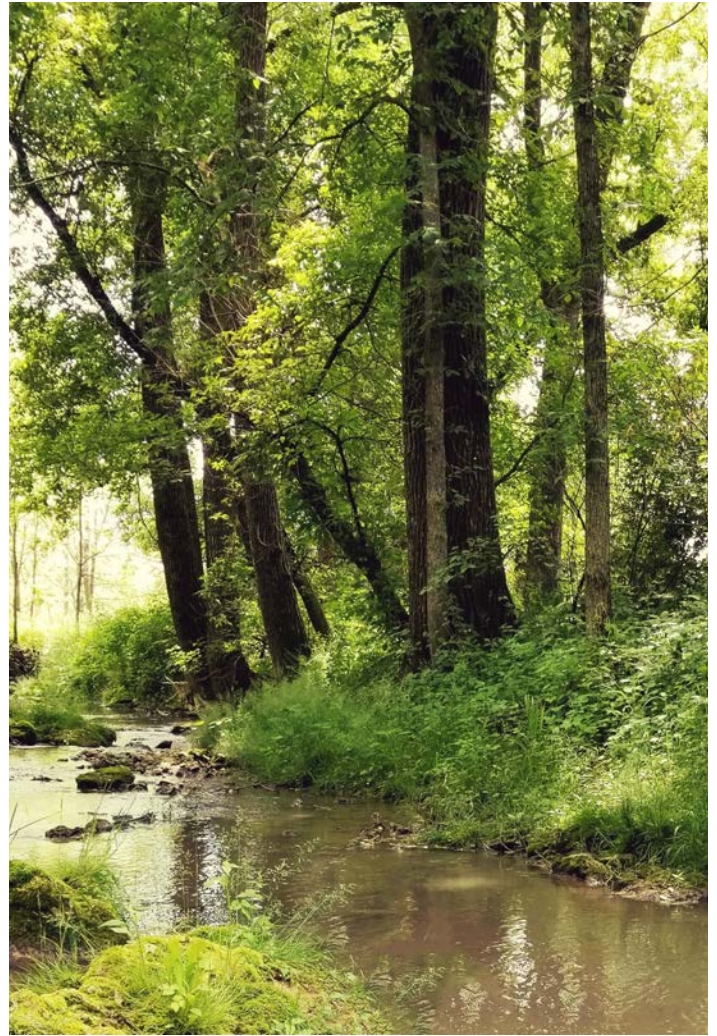

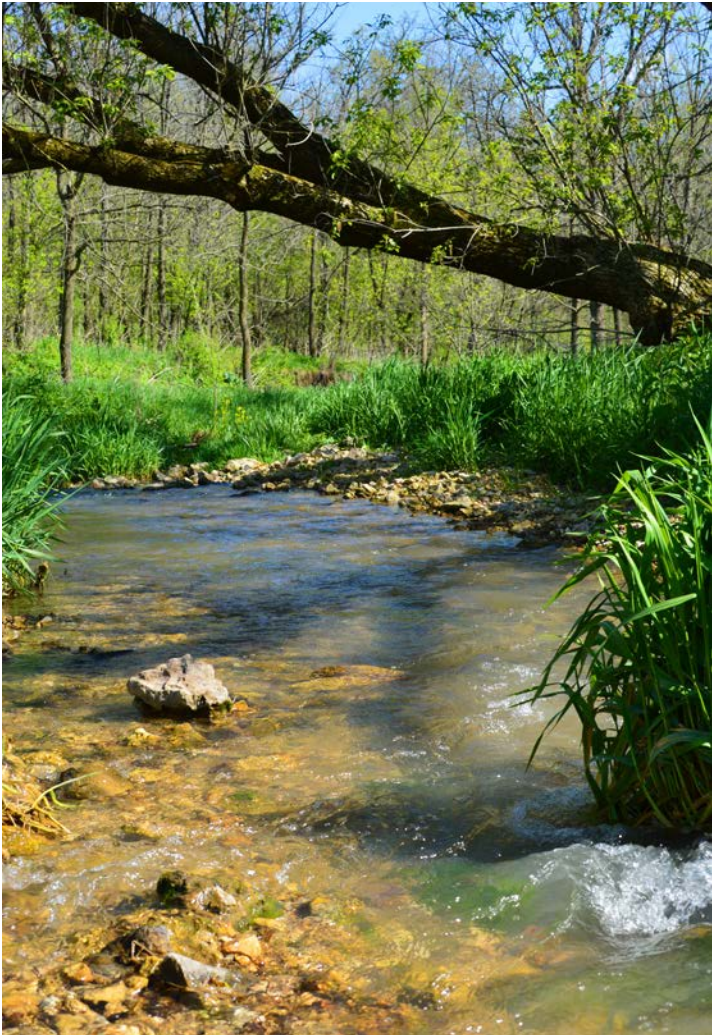

A large addition to the existing shed with living quarters was recently built and is waiting to be finished to fit your needs.

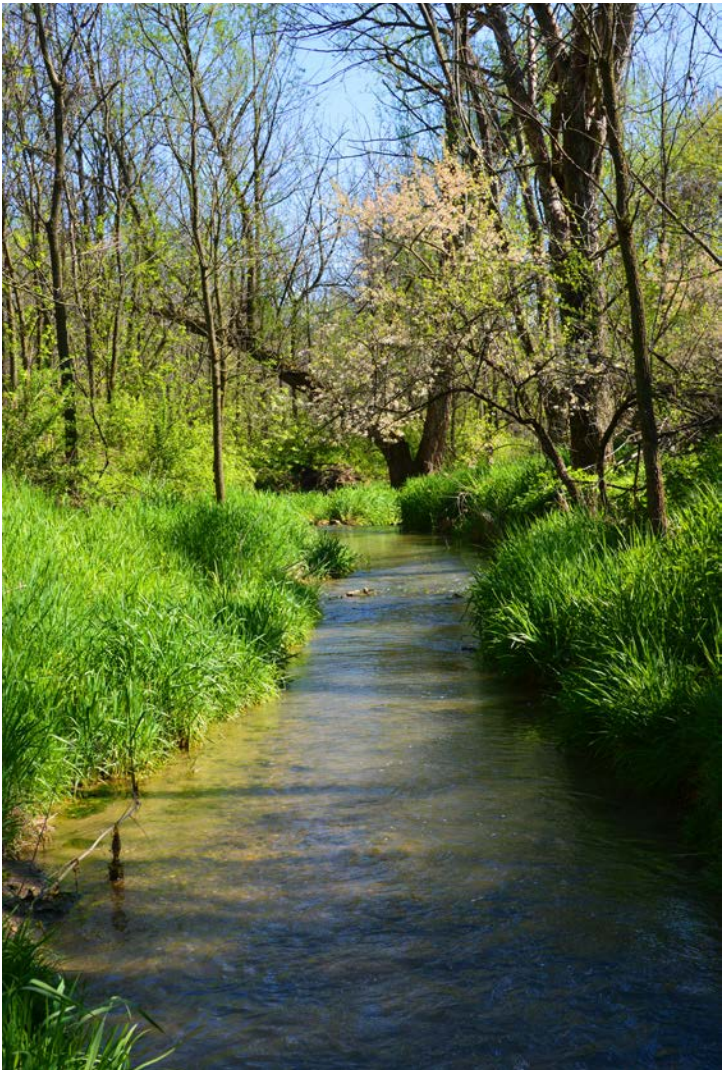

This is a quiet and peaceful setting surrounded by true beauty.

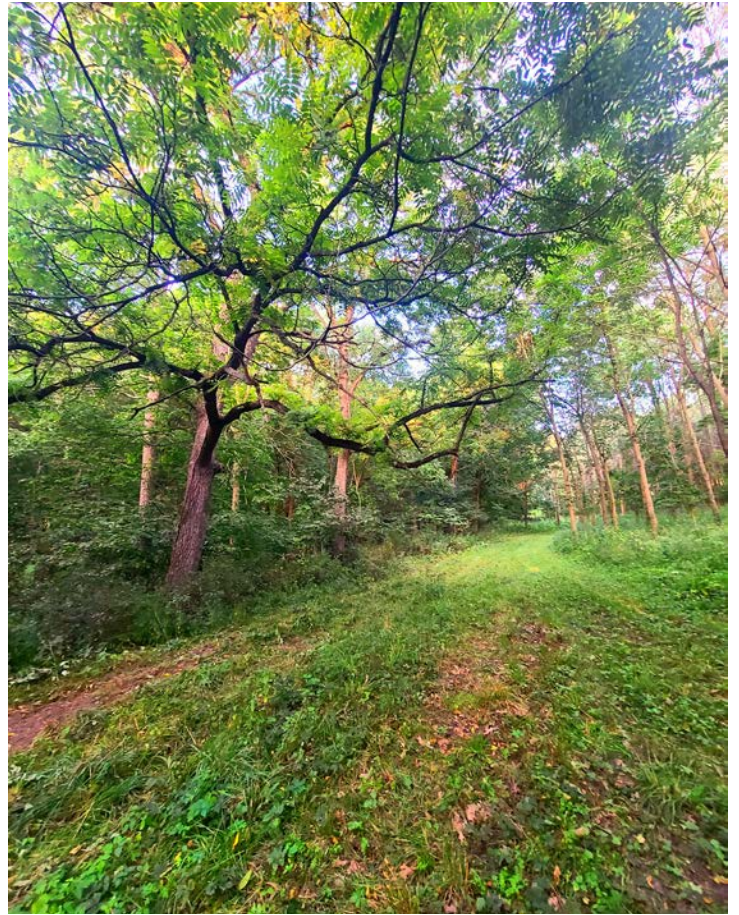

The above statement was written by the current owner of the property, but no liability for accuracy, errors or omissions is assumed by Murray Wise Associates LLC.
